

LINEAR WALLING

Specifications

Linear Walling

Create expression while
maintaining a modern &
timeless aesthetic

Linear Walling places a specific emphasis on creating linear or straight-line patterns. This approach often involves arranging stones in a way that highlights clean edges and geometric precision.

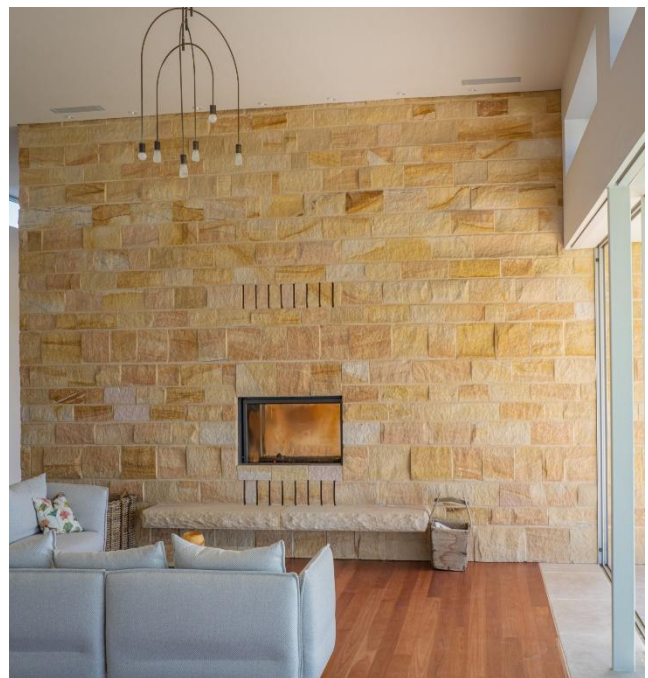

The use of Linear Walling often aligns with contemporary or modern design aesthetics, providing a sleek and clean appearance.

The combination of subtle textures tastefully enhances Linear Walling which is clearly visible with our Argent Lodge Walling.

Linear Walling is versatile and adds a sense of structure. Commonly used on feature walls, landscaping design and fireplaces.

*Lead times may apply. Weights may vary and are indicative.

"Choices Made Easy"

Sourcing stone is important for several reasons, particularly in the context of construction and architectural projects. The choice of stone and its origin can significantly impact the quality, durability, and sustainability of the finished product.
